PRODUCTS

KNOW WHICH COLOURS ARE TRENDY IN KITCHENS? THAT'S INCLUDED WITH ZOOM®

A cabinetmaker's customers want **SOMETHING UNIQUE**. Therefore great when he can offer confident style advice for design and colour combinations. We provide the right tools for the job.

With ZOOM®, cabinetmakers can offer convincing consultations with room visualisation and samples.

The VDS PROFI software also suggests decor combinations.

You do the layout, we look after the design. From purist timelessness to cosy authenticity or a mix of both: our design experts are always monitoring popular living styles. That is how we developed the twelve ZOOM® colour and decor worlds. We support you in selecting the right decors that match the style and desires of your customers. We also keep you up to date with our trend newsletter. Our decor recommendations

show you the best colour combinations. By the way, you can see how they look in your designs with VDS PROFI.

VDS

VDS PROFI enables impressive presentations of ZOOM® decors with your designs. More at: www.egger.com/vds

Kitchen doors in the H1487 Bramberg Pine decor with the ST22 Matex surface can be used to set rustic accents in modern kitchens.

Next generation presentations with VDS

WORKTOPS

The ZOOM® collection also includes a range of
worktops with guaranteed durability. An overview of
our special worktop decors is found on pages 48-51.

You can barely see the “Finest” perforation of the acoustic wall panels in H1277 Light Lakeland Acacia – but you can hear the difference.

NO NEED TO DO IT ALL YOURSELF

Modern materials not only have to appeal to the eye but also speak to the ear: our **PROACOUSTIC BOARDS** absorb sound while offering all the design freedom of ZOOM® decor and texture combinations.

50 mm EUROLIGHT® desking in H1372 ST22 Natural Aragon Oak.

The ZOOM® collection can save you work. It contains materials suitable for meeting various requirements, from certified low flammability Flammex products to the acoustically effective ProAcoustic series.

Our EUROLIGHT® boards make thick, solid looking units lightweight; OSB Combiline shelves feature high bending strength across impressive spans. LED auriLUX® ceiling elements are not just acoustically effective; high-power LEDs are an elegant solution for

consistent lighting and colour temperature control. All of these options are available in the decor of your choice.

CONTRACT BUSINESS

More on contract products such as MDF, B1, P5, acoustics, OSB Combiline and composites starting on page 59.

DEFINITE

From the selection of materials to the realisation of special requests and customer approval – ZOOM® makes your work easier.

EGGER supplies Din-A4 samples of all decors quickly and easily for your design process.

THE BETTER CONCEPT COMES OUT ON TOP

Architects meet high requirements quickly. Openness to innovative solutions offers an edge. For example, does it need to look authentic and weathered **LIKE REAL WOOD**, but need to have the qualities of a high-tech product? No problem with ZOOM®. And the cost is right too.

Uncompromising aesthetics, quality and processing characteristics

The ZOOM® decors are available **ON MANY OF OUR COREBOARDS**. For example on EUROLIGHT® lightweight boards for sliding doors and shelving. This makes high added value possible. It means that the intelligent selection of materials allows you to achieve maximum impact for your expenditure. We can also support your planning process with high-resolution decor data for your CAD programme.

Digital printing: here D0020 Volcano Flames has been customised with shades of blue.

Get DIN-A4 samples quickly and efficiently via our **SAMPLE SHOP**:
www.egger.com/shop

Ordering samples is simple and easy. Watch the brief demo online:
www.egger.com/video-sample-service

DIGITAL PRINTING

We can produce digital printing decors based on your own concepts and ideas starting with a minimum quantity of 260 m².

MOBILE

Want to benefit from current trends, for example by fabricating sliding doors for open living concepts? Work with the ZOOM® decor range!

BEING ACTIVE REQUIRES ACTIVE PARTNERS

Trends change, good partners remain. The ZOOM® collection is a modular system that can help make you flexible. And our service accounts for today's speed of your business. Discuss your projects with us!

We have developed solutions that help fabricators compete. That includes fast delivery through the stock and delivery service of your EGGER distributor. Our sales team or your distributor's employees are happy to offer personal advice on the application possibilities of our functional materials, such as the low flammability Flammex products, or EUROLIGHT® lightweight boards that make your product practical and innovative. We have current, trend orientated decors for furniture production in our programme. Our Virtual Design Studio VDS PROFI simplifies the development of your sliding door or furniture collections. The software helps visualises all our designs, which also makes it fast and uncomplicated to use for presentations.

SAVE TIME! Your distributor can supply the ZOOM® collection quickly and reliably. Ask and see for yourself!

With us, consultancy is inclusive. We solve your problems together. A video clip shows how you can benefit from our services:

NEUTRAL UNI COLOURS

White, beige, grey and black, the classics for timeless design, have gained even more popularity over the last few years. At the same time, nature and authenticity are in demand. Warm greys and brown tones are also becoming important, especially in combination with woodgrains.

CLASSIC & MODERN

Various woodgrains such as maple, beech and cherry are amongst our bestsellers. They have a permanent place in the ZOOM® collection for the classic interior design style in both domestic and commercial applications. We have also developed newer, modern interpretations of these bestselling classics that can be easily combined with our uni colours.

AUTHENTICS

Nature meets design. What was considered a flaw in the past is now seen as individual and authentic: woodgrain decors with dominant knots, cracks and striking features bring originality into today's world of interior design. The new ZOOM® surface ST10 Authentic gives these decors a matching, rough, tactile naturalness that you would expect.

EXOTIC

Tropical or fantasy woodgrains constitute an exclusive alternative to the everyday. Classic, exotic wood types tend to have red tones, whilst modern exotic wood types are often brighter or feature more grey tones. The ST15 Office surface brings out bright colours whilst ST22 Matex gives the look and feel of linear brushed wood.

H3012 ST22 Coco Bolo**H3090** ST22 Driftwood**H3006** ST22 Sand Zebrano**H3005** ST22 Grey Beige Zebrano**H3031** ST9 Dark Cordoba Olive**H3082** ST22 Amazonas**FOR YOUR VISUALISATION**

H1111 ST15 Snakewood

H3025 ST15 Macassar

H3058 ST22 Mali Wenge

H1555 ST15 Wenge

ARTWOODS

Artwoods consist of wood designs and colours that are not found in nature. These include striking and dominant large scale designs, that can be used on expansive surface areas to create an imposing effect. In this decor world, you will also find finely linear wood effects with metallic lines or fantasy colours.

**H1105** ST9 Aspen Beige**H1106** ST9 Aspen Grey**FOR YOUR VISUALISATION**

F584 ST22 Fino Cinnamon

F583 ST22 Fino Bronze

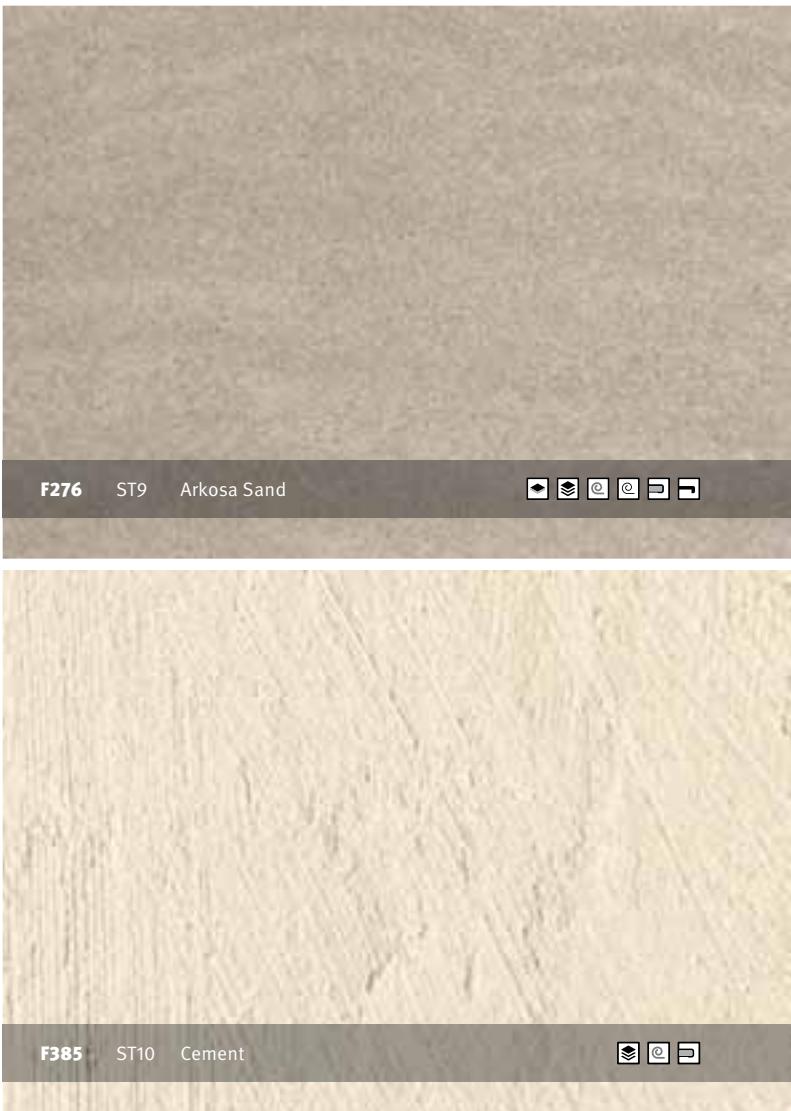

STONE & MINERALS

This group contains a broad spectrum of artificial and natural types of stone in authentic reproductions, from smooth marble, travertine and sandstone to new decors such as broken oil shale. These decors play an important role in interior design and have a significant impact in the design of worktops. Stone & mineral decors are also gaining popularity within interior design, for both internal doors and furniture fronts.

F214 ST10 Peacock Slate**F870** ST10 Leon Slate

USED LOOK

Materials with signs of use, weathering or wind cracks, have the vintage look.

In a world where flawless surfaces have prevailed, used look materials bring life and character to the field of design. These decors create the opposite effect to purism and linearity with their imperfections.

F403 ST10 Vulcano Brown

F402 ST10 Vulcano Grey

FOR YOUR VISUALISATION

To provide you with a better impression of the woodgrains which have lots of character, we've included a scan from a 900 × 600 mm board.

F633 ST15 Grey Brown Metallo

F636 ST15 Titanium Blue Metallo

METALLICS

Real aluminium laminates and perfect metal reproductions create an exciting contrast to wood and uni colours. In addition to cool classic metals such as aluminium, stainless steel and titanium, warm metal colours such as bronze, lava and cubanit are gaining importance in design. Pearlescent printing pigments create a metallic effect.

F489 ST2 Quartz Inox

F447 ST2 Quartz Lava

F784 ST2 Stainless Steel Microline

F488 ST2 Quartz Cubanit

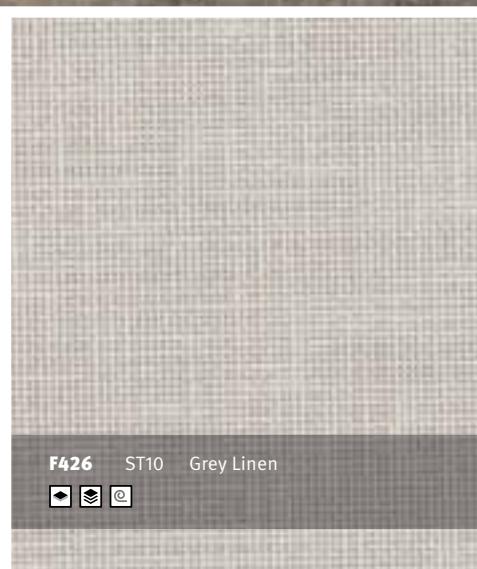

F440 ST2 Quartz Bronze

TEXTILE & LEATHER

Soft, natural materials such as textiles and leather create warmth and cosiness in the world of modern interior design. They are perfect for giving commercial rooms that personal touch. With leather grains or textile fibres, these decors reveal an appearance complemented by their authentic feel.

TEXTURE MEETS COLOUR

Surface textures are also playing an increasingly important role in design.

In this colour group, the textures with their depth or matt-gloss effects create exciting fantasy patterns in the interplay of uni colours. This results in new, highly modern design possibilities.

VDS FAMILY – THINK WITHOUT LIMITS

Digital technologies allow us to visualize the world of furniture and interior decorating in a completely new way today. With its **VIRTUAL DESIGN STUDIO**, EGGER has created an interactive experience to support individual clients with their purchases.

VDS HD

“VDS HD” is a high-resolution program that can be run on a high-definition (HD) multi-touch flat screen. Various room sets can be interactively loaded on the 40-inch screen from a room library and high-resolution decors can be applied. Services include the integration of your own room images, as well as ongoing updates when new decors are introduced.

VDS HD WITH MRI TECHNOLOGY

MRI (Mixed Reality Interface) technology is a system for the interactive, optical recognition of decor samples. Patterns equipped with a marker are recognised by the MRI system and integrated directly into your room situation on screen. By combining original samples with the digital world, customers are offered an **INTERACTIVE EXPERIENCE**.

VDS LIVE

With the VDS HD LIVE customer version, EGGER supports the projection of decors onto actual, neutral furniture carcasses. Full-scale rendering offers the ultimate room experience you can touch. Switching between the visualisation on the furniture carcass and on the touch screen is possible. This system assists the imagination in finding the optimum decor combinations and applications.

VDS PROFI

VDS PROFI 2.0 is a flexible, cross-manufacturer visualisation software and the **PERFECT TOOL FOR PC STATIONS AND LAPTOPS**. It supports the individual design of rooms with furniture and flooring decors. Place EGGER decors into a wide variety of available room sets or alternatively upload your own images. For a free and lighter version of VDS PROFI named **VDS ONLINE** please visit www.egger.com/vds.

VDS MOBILE

With the free VDS MOBILE app from EGGER, you can view all decors in the ZOOM® and flooring collections on your iPad and enlarge them to a full-screen view.

For more information about the digital solutions, please visit www.egger.com/vds

**ST10 AUTHENTIC**

Makes even textile & leather decors appear authentic, shown above in F428 ST10 Leather Brown

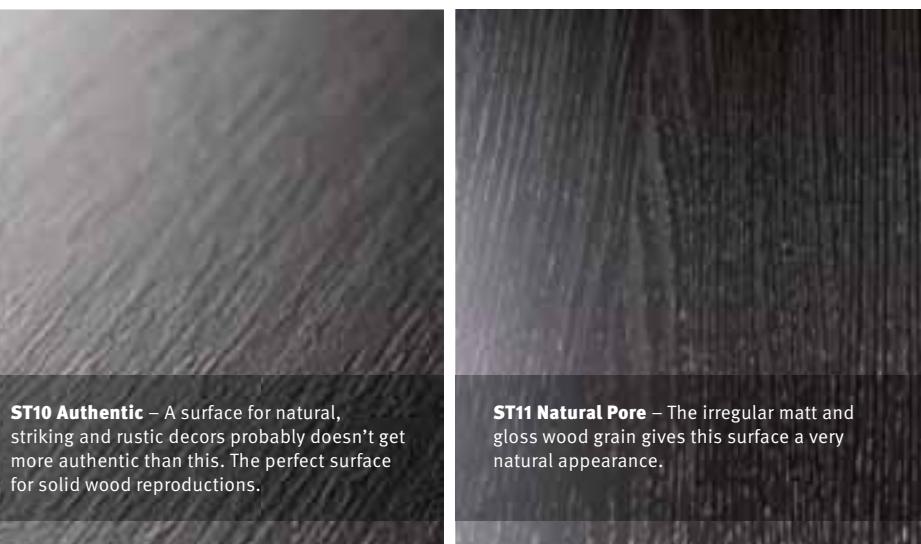

ST79 Finepore matt – A regular, closely arranged wood pore texture, which is well suited for use with classic and elegant wood reproductions.

ST9 Perfect Matt – Gives uni colours and woodgrain decors a very natural feel and follows the matt surface trend.

ST15 Office – This universal surface is suitable for intensive uni colours. It also highlights the appearance of elegant woodgrain decors.

ST11 Natural Pore – The irregular matt and gloss wood grain gives this surface a very natural appearance.

ST22 Matex – Thanks to its feel and matt-gloss areas, it gives linear and lively woodgrain decors more naturalness and depth for a more realistic wood-like finish.

ST70 Elegance – An even surface with a lower gloss level that works well with fantasy decors, in particular, marble effects.

ST18 Waveline – The crosswise texture reveals a depth previously unknown with melamine boards. It appears modern and is reminiscent of coated, milled solid wood.

A1 Artwave – An innovative surface that puts an appealing appearance and glossy areas in the foreground.

SM Semi Matt – A smooth, paint-like and untextured surface finish. Mainly combined with uni colours.

ST82 Granito – Deep embossed surface with robust surface properties to give a sand blasted effect.

ST88 Velvet – This surface is reminiscent of small mosaic stones. Thanks to its design, it creates a variable interplay of colours in all uni hues.

ST30 Gloss Finish – A smooth surface with high gloss level, especially suited for uni colours and premium woodgrain decors.

ST2 Diamond – Robust, striking and very durable, this surface is best used with metallic and stone effect Fantasy decors.

ST22 MATEX

Kitchen front in H1487 ST22 Bramberg Pine reveals rustic depth

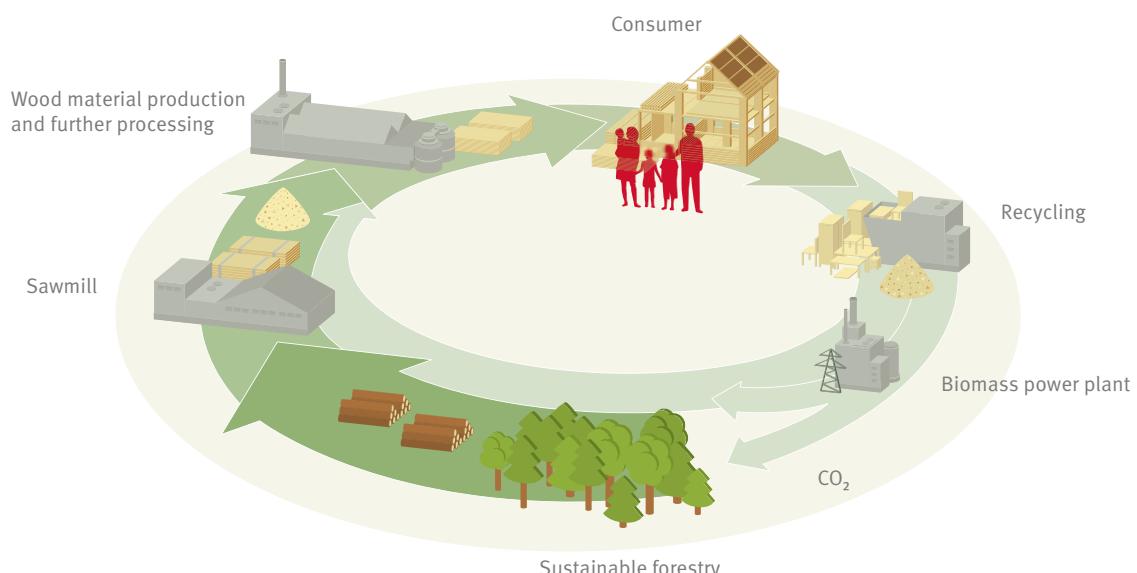

ENVIRONMENTALLY FRIENDLY EGGER PRODUCTS

Protecting the environment begins with sustainable forestry

In our core values, we have established that conserving resources is a top priority for EGGER. We achieve this by promoting sustainable forestry and through integrated plants, energy generation in our own biomass power plants, state-of-the-art manufacturing technology and environmentally friendly logistics systems.

Through the material and thermal use of wood in a closed cycle, we reduce CO₂ emissions that are harmful to the environment. We are the first wood-based material manufacturer to have this potential of our wood-based materials confirmed through independent audits and to disclose it in our environmental product declarations (EPDs).

All processes surrounding our sustainable philosophy are efficiently linked in an environmental cycle

- ⋮ Experience the **ENVIRONMENTAL CYCLE** through videos and animations on our website www.egger.com/ecocycle

WHAT ARE ENVIRONMENTAL PRODUCT DECLARATIONS?

EPDs (environmental product declarations) provide all technical and environmental data for a product in one document. This data is used in calculations on the environmental impact of the product – from production through use to disposal. An independent expert committee reviews and confirms the data.

For the production of wood based materials, EGGER only uses wood from forest thinnings and residual wood in selected quality from sawmills, as well as suitable recycled wood. In doing so, we treat forest resources and the environment responsibly. Our plants are PEFC or FSC-certified, depending on wood availability.

EGGER PRODUCTS – INNOVATIVE SOLUTIONS AND THE HIGHEST QUALITY FOR YOUR PROJECTS

With EGGER, you are putting your trust in an experienced partner with numerous plants across Europe. Our highly modern, state-of-the-art production facilities allow us to guarantee the high quality of our entire product range. In addition, our extensive network of sales offices and numerous specialist distributors ensures reliable service and logistics.

Our base products such as EUROSPAN® Raw Chipboards, MDF boards, EUROLIGHT® Lightweight boards and OSB Combiline boards are available to you for the implementation of your projects as coreboards for all our decors. For decorative interior design, all products in the ZOOM® collection are co-ordinated in **MATCHING DECORS AND TEXTURES**.

EGGER also offers technically advanced products such as low flammability or acoustically effective boards. In co-operation with our partners, we even supply pre-fabricated furniture components.

Raw Products

- EUROSPAN® Raw Chipboards
- Thin Chipboards
- MDF Boards
- Thin MDF Boards
- OSB Combiline
- EUROLIGHT® Raw

Decorative Products

- EURODEKOR® Melamine Faced Chipboards
- EURODEKOR® Plus
- EUROLIGHT® Decor
- Laminates
- Laminate Bonded Boards
- Melamine and ABS Edging
- Worktops
- Front Elements
- Window Sills
- ProAcoustic Acoustic Boards
- Compact Laminate Boards
- Pre-Fabricated Furniture Components

EUROSPAN® RAW CHIPBOARD

EUROSPAN® raw chipboard is the classic coreboard. It is suitable for a wide range of applications.

PROPERTIES:

- Fine surface texture
- High-density core layer
- High surface layer separation resistance
- Extremely low sand content (long tool life)
- Clean processing without chipping

Board Type	Applications	Advantages	Certification	Thicknesses
EUROSPAN® E1 P2 CE	Furniture and interior design in dry conditions	<ul style="list-style-type: none"> • Very good stability thanks to 3 layer construction • Outstanding lamination properties 	According to EN312, type P2	8, 10, 12, 13, 16, 18, 19, 22, 25, 28, 30, 32 and 38 mm

AVAILABILITY

Standard sizes: 5,610 × 2,070, 4,110 × 2,070 and 2,800 × 2,070 mm

Cut-to-size service available from 10 full size boards 5,610 × 2,070 mm, with the same cut-to-size dimensions.

SPECIAL COREBOARDS

Board Type	Applications	Advantages	Certification	Thicknesses
EUROSPAN® Flammex E1 P2 B/B1/M1 CE (red coloured core)	Interior design, wall cladding, partition walls and doors, fixtures and furniture, e.g. in public spaces	<ul style="list-style-type: none"> • Surface suitable for laminating • No droplets while burning • Low smoke development • Low heat release 	Per EN 13501-1 in fire protection class EUROCLASS B, per DIN 4102-1 in B1 and fire protection class M1 per NFP 92-501	12, 16, 19, 22, 25 and 28 mm
EUROSPAN® E1 P5 CE (green coloured core)	Load bearing in humid conditions: bathroom and sanitary furniture, shelves, flooring	<ul style="list-style-type: none"> • Excellent bending resistance • Low swell values • Moisture-resistant bonding 	Per EN 312, type P5 Static values confirmed by building authorities	16, 19, 22, 25 and 38 mm
EUROSPAN® E1 P3 CE (green coloured core)	Furniture and interior design in humid conditions: bathroom and sanitary furniture, worktops, window sills	<ul style="list-style-type: none"> • Highly resistant against swelling • Moisture-resistant bonding 	Per EN 312, type P3	Available upon request
EUROSPAN® E1 EPF-S CARB2 P2 CE	Furniture and interior design with stricter formaldehyde emission requirements	<ul style="list-style-type: none"> • Special board with reduced formaldehyde content • All advantages of the E1 P2 board 	EPF standard, CARB 2, IKEA standard IOS MAT 0003 and Blue Angel (RAL UZ 38)	Available upon request
EUROSPAN® JP F0,3 (*****)	Furniture and interior design in dry conditions	<ul style="list-style-type: none"> • Special board with greatly reduced formaldehyde content • Meets strictest Japanese requirements 	In formaldehyde class F**** per the Japanese JIS standard	Available upon request

WHAT MAKES THE EGGER FLAMMEX PRODUCTS SO SPECIAL?

They are classified according to the European EN 13501-1 standard and the strictest fire protection class for organic products, Euroclass B, gaining valuable extra time in emergencies. They slow the spread of flames and exhibit low heat release and smoke development.

In addition to the protective function in case of fire, the low flammability EGGER products guarantee design versatility thanks

to decors and texture combinations with other products in the ZOOM® collection. The low flammability chipboard with the red core is excellent for melamine coating or as a coreboard in combination with Flammex laminate.

For more information and datasheets on our low flammability products, visit www.egger.com/flammex

THIN CHIPBOARD

EGGER thin chipboard is an extra-thin chipboard suitable for lamination, which is particularly well suited for back panels, door decks and lightweight boards. The boards have a fine, smooth surface.

PROPERTIES:

- High bending strength
- High surface soundness
- Light wood effects
- Per EN 312, type P2 certified

Board Type	Applications	Advantages	Thicknesses
Thin chipboard E1 P2 CE	In dry conditions: door decks, surface layers for lightweight boards, upgrading with laminates, PVC or finish film	<ul style="list-style-type: none"> • Light and fine surfaces • Suitable for the application of all surface refinements • Low bark content • Available sanded and unsanded 	3.0; 3.2; 4.0; 5.0; 6.0 and 7.0 mm
Thin chipboard E1 FIN P2 CE	In dry conditions for: back panels, drawer bottoms, door decks, partition boards, panels, caravan construction, exhibition stands	<ul style="list-style-type: none"> • Film on one or both sides, also available with balancer paper • With PVC or finish film 	3.2; 4.0; 5.0; 6.0 and 7.0 mm

AVAILABILITY

Standard size: 2,800 × 2,100 mm

Cut-to-size service available from 50 boards, 2,800 × 2,100 mm, with the same cut-to-size dimensions.

Minimum quantities as well as other sheet sizes and thicknesses available on request.

Cut-to-size service

We offer cut-to-size panels produced **WITH PRECISION**
ON HIGHLY MODERN, POWERFUL SAWS.

MDF BOARD

EGGER medium-density fibreboard is ideal for furniture construction and interior design.

PROPERTIES:

- Very good profiling
- High edge strength
- Very good density profiles
- Excellent elastomechanical properties
- Even fibre structure
- Very good surface quality
- High loading capacity
- Low swelling behaviour
- Certified per EN 622

Board Type	Applications	Advantages	Thicknesses
MDF-ST E1 CE	Furniture and interior design in dry conditions	<ul style="list-style-type: none"> • Ideal surface quality for lamination • Good milling properties • High bending strength 	8, 10, 13, 16*, 19*, 22, 25*, 28* and 38 mm

AVAILABILITY

Standard sizes: 2,800 × 2,070 mm, marked with * also 4,110 × 2,070 mm

Minimum quantities as well as other sheet sizes and thicknesses available on request.

SPECIAL COREBOARDS

Board Type	Applications	Advantages	Thicknesses
MDF-MB E1 CE	Dry conditions: especially well suited for 3-D furniture fronts	<ul style="list-style-type: none"> • Especially fine fibre quality • High edge strength 	Available upon request
MDF-MBP-L E1 CE	Dry conditions: powder-coated furniture fronts	<ul style="list-style-type: none"> • Raw density profile optimised for powder coating • Improved conductivity 	Available upon request
MDF E1 EPF-S CARB2 CE	Furniture and interior design with stricter formaldehyde emission requirements	Meets the requirements according to E1, EPF-S, CARB 2 and IKEA IOS-MAT 0003	Available upon request

THIN MDF BOARDS

Board Type	Applications	Advantages	Thicknesses
Thin MDF E1	Dry conditions: back panels on furniture, folding elements, drawer bottoms and door blanks	<ul style="list-style-type: none"> • Ideal surface quality for lamination • Good milling properties • High bending strength 	2.4; 2.8; 3.8; 4.8 and 5.8 mm
Thin MDF lacquered		<ul style="list-style-type: none"> • Can be lacquered on one or both sides • 20 decors colour matched with other ZOOM® products • Drilling, perforating and milling possible • Patented folding technology 	2.5; 3.0; 4.0; 5.0 and 6.0 mm

AVAILABILITY

Standard size: 2,800 × 2,090 mm

Delivery within 10 days, minimum quantity 50 to 120 units depending on version.

Other sheet sizes, thicknesses and special coreboards such as THIN MDF E1 EPF-S CARB2 available on request.

OSB COMBILINE

With EGGER OSB Combiline, we combine the outstanding bending strength of our EUROSTRAND® OSB board with the excellent lamination properties of EGGER Thin MDF in a joining element. This makes OSB Combiline ideal for demanding commercial applications or, in the laminated version with all ZOOM® decors, perfect for furniture construction.

Board Type	Applications	Advantages	Thicknesses
OSB Combiline	<ul style="list-style-type: none"> • Furniture components subject to bending stress (e.g. overlength shelf boards subject to heavy loads) • Furniture components with high hardware mounting requirements • Structures with large spans • Shop fitting and interior design • Trade fair furnishings and set building • Partition walls 	<ul style="list-style-type: none"> • OSB core layer for very good bending strength in all board directions • Outstanding screw pullout resistance • Very well suited for mounting fasteners and hardware • Highest lamination quality through thin MDF surface layers • Surface suitable for milling • Good dimensional stability 	19, 22 and 25 mm

APPLICATIONS

AVAILABILITY

Standard sizes: 5,610 × 2,070 and 2,800 × 2,070 mm
Minimum quantities as well as other sheet sizes and thicknesses available on request.

EUROLIGHT® RAW

The interior of EUROLIGHT® lightweight boards consists of a honeycomb core. In spite of their low weight and reduced use of raw materials, EUROLIGHT® boards feature outstanding stability and thereby revolutionise the available design and construction options. EUROLIGHT® lightweight boards have a standard 8 mm EUROSPAN® surface layer.

Board Type	Applications	Advantages	Thicknesses
EUROLIGHT® Raw	Furniture, doors, interior design	Minimised weight, high warping resistance, optimum bending strength	38, 50 and 60 mm

AVAILABILITY

Standard sizes: 5,610 × 2,070 and 2,800 × 2,070 mm
Minimum quantities as well as other sheet sizes and thicknesses available on request.

For processing information, visit
www.egger.com/downloads

EURODEKOR®

EURODEKOR® melamine faced chipboard offers unique design flexibility for furniture construction and interior design. EGGER melamine and ABS edging as well as EGGER laminate from stock and laminate bonded boards are available in decor and texture combinations with ZOOM®.

PROPERTIES:

- Comprehensive design versatility with co-ordinating surface textures
- Optimum surface properties
- Ideal cutting quality without chipping
- Processing with low tool wear
- In accordance with EN 14322

For **AVAILABILITY** see the decor section in this brochure or the ZOOM® availability guide.

Further core boards available upon request:
EUROSPAN® E1 P3/MR CE, EUROSPAN® JP F0,3 (F****),
EUROSPAN® E1 EPF-S P2 CE (CARB 2),
EUROSPAN® Flammex B/B1/M1, EUROSPAN® E1 P5 CE,
EGGER MDF-ST E1 CE, EUROLIGHT® Lightweight Boards,
EGGER OSB Combiline. For the EURODEKOR® technical
datasheet, visit www.egger.com/downloads.

DECOR PROGRAMME WITH EUROSPAN® E1 P2 (STANDARD COREBOARD)

Decors	Format	Thicknesses
ZOOM® decors	2,800 × 2,070 mm	8, 10, 12, 16, 18, 19, 22, 25, 28, 30, 32 and 38 mm
ST30 gloss finish decors		10, 12, 22, 28, 30, 32 and 38 mm

EURODEKOR® PLUS

Composites on all EGGER coreboards for commercial applications

Board Type	Composition	Area of application
EURODEKOR® PLUS HR	<ul style="list-style-type: none"> • Two-sheet composition • Overlay paper in addition to decor film 	<ul style="list-style-type: none"> • Front elements and horizontal surfaces subject to heavy wear in the domestic area • Optimised for the office furniture standard
EURODEKOR® PLUS ML 02	<ul style="list-style-type: none"> • Two-sheet composition with an underlay / barrier paper • Max. layer thickness 0.2 mm 	<ul style="list-style-type: none"> • Carcasses and front elements in upmarket interior design
EURODEKOR® PLUS ML 03	<ul style="list-style-type: none"> • Multi-layer composition with several underlay / barrier papers • Overlay for printed decors • Max. layer thickness 0.3 mm depending on application 	<ul style="list-style-type: none"> • Horizontal surfaces in the public area
EURODEKOR® PLUS ML 05	<ul style="list-style-type: none"> • Multi-layer composition with several underlay / barrier papers • Max. layer thickness 1.0 mm 	<ul style="list-style-type: none"> • School desks • Laboratory furniture • Care facilities and hospitals

EURODEKOR® Plus HR (high abrasion resistance)

EURODEKOR® Plus ML (multi-layer) 02

AVAILABILITY

Standard size: 2,800 × 2,070 mm
Minimum quantity HR 100 boards, ML 20 boards
Other formats available upon request.

EUROLIGHT® DECOR LIGHTWEIGHT BOARD

EGGER is the first manufacturer to offer a selection of universal, lightweight building materials with a melamine resin surface for interior design applications. EUROLIGHT® lightweight boards feature straightforward processing, direct edging and compatibility with conventional fittings.

- 1 Decor
- 2 EUROSPAN® surface layer in 8 mm
- 3 Cardboard honeycomb core
- 4 EUROSPAN® surface layer in 8 mm

SAVES RESOURCES

- Effective use of wood and optimised use of energy in material production

FUNCTIONAL PROPERTIES

- Optimum bending strength combined with high warping resistance thanks to the sandwich construction

DESIGN FREEDOM

- EGGER decor and texture combinations for edging and surfaces as well as new design possibilities in dimension, thickness & format

OPTIMISED LOGISTICS

- Straightforward installation and effective use of transport volumes

ERGONOMICS – WEIGHT

- Low package weights, easy, straightforward handling in processing, transportation and installation

FUNCTIONAL APPLICATIONS

- Expression of prestige through dimension and format for: kitchen, living room, bedroom and office furniture, trade fair, shop and interior design

Board Type	Applications	Advantages	Thicknesses
EUROLIGHT® Decor	Furniture construction, interior doors, shelves	Minimised weight with high strength, decors matched with EURODEKOR® melamine faced boards	38 and 50 mm
EUROLIGHT® Priming Film	Furniture and interior design components, coated shelving boards	No putty or filler required, can be directly coated with all common coating types	38 and 50 mm
EUROLIGHT® cut-to-size with frame in fixed format	Postformed elements, furniture, doors, interior design	Very good edge processing and hardware mounting through raw chipboard frame	Upon request

AVAILABILITY

Standard sizes : 5,610 × 2,070 and 2,800 × 2,070 mm

ZOOM® decor and texture combinations for EUROLIGHT® decor are available in matching laminates and EGGER ABS edging, width 42 and 54 mm, thickness 2 mm, on 25 m roll.

For **EUROLIGHT® DECORS**, see the decor section in this brochure or the ZOOM® availability guide. Additional decors, sheet sizes and thicknesses available on request.

See all information on the straightforward processing of EUROLIGHT® in a brief video: www.egger.com/video-eurolight-processing

For application ideas, technical information, transportation and storage instructions, see the brochure for lightweight building solutions with ZOOM®: order or download in PDF format from www.egger.com/downloads

LAMINATES

EGGER laminates combine great durability and an attractive design. The multi-layer composition and the materials that are used guarantee high surface quality across all decors.

Not only are EGGER laminates available in matching ZOOM® decor and texture combinations, they also constitute versatile materials for various applications beyond classic furniture construction and interior design, for example in the door industry, trade fair and shop fitting or the shipbuilding and car industries.

PROPERTIES:

- High strength
- Decor and texture combinations with all ZOOM® products
- Various laminate qualities for a wide variety of applications

Product	Application	Advantages	Technical Characteristics
Laminate MED	Worktops, furniture fronts, window sills, doors, tabletops, boards for recesses and carcasses	High durability, suitable for post-forming, universal application, with additional MED qualification	Per EN 438:2005, laminate MED can be classified as HGP (horizontal general-purpose post forming). Thanks to the MED quality (Marine Equipment Directive) confirmed by the Lloyd's certificate, it is also suitable for shipbuilding applications.
Real aluminium laminate	Anywhere real metal surfaces are desired	The cool, metallic appearance is the key feature of this laminate	Made of core layers impregnated with phenolic resins and a coated aluminium foil. The coating can be transparent or coloured.
Laminate W1001	For solid-coloured laminate interior design solutions	Solid colour, emphasis of the laminate edge	Not suitable for post-forming. Please observe special processing instructions.
Laminate Flex (on a roll)	Worktops, furniture fronts and window sills	The especially high flexibility of this laminate quality supports radii from 3 mm. Waste is minimised through custom laminate lengths.	Per EN 438:2005, EGGER Laminate Flex can be classified as laminate type P (post-forming).
Laminate painting grade (made-to-order)	For paintable furniture and interior design	Custom colours	Made of several core layers impregnated with phenolic resin, one paintable front side and one rear side suitable for gluing
Laminate Flammex (order-specific)	Lamination of doors, partition walls and wherever low flammability elements are needed	Low flammability, low smoke development, no softening and no dripping while burning	Classified as laminate type F (flame-retardant) per the EN 438:2005 standard. In case of fire, it meets the special requirements of building materials class B1 per DIN 4102-1:1998-05 and the French fire behaviour category M1 per NF P 92-501.

EGGER LAMINATE PROGRAMME

Decors	Formats	Thickness
All ZOOM® standard decors MED, real aluminium and W1001	2,800 × 1,310 mm	0.8 mm
Laminates MED in door sizes	2,150 × 950 mm	
	2,150 × 1,020 mm	
	2,350 × 1,310 mm	
Decors in ST30	3,050 × 1,310 mm	

Our door size laminates are **OPTIMISED TO REDUCE WASTE!**

We produce other lengths or custom digital printing decors for specific orders, subject to the minimum order quantity of 260 m² per version.

STOCK DECORS FOR DOOR SIZE LAMINATES are identified by this delivery symbol. For more information on door size laminates, order the brochure or download it in PDF format from www.egger.com/downloads

FOR LAMINATE DECORS, see the decor section in this brochure or the ZOOM® availability guide.

LAMINATE BONDED BOARD

Laminate bonded board features high durability and resistance against abrasion, scratching and impacts. These properties guarantee a long lifespan – ideal for high requirements, especially in commercial applications and furniture construction.

The special feature of laminate bonded boards is the ability to individually combine all ZOOM® laminate decors with all available coreboards. This results in virtually unlimited design opportunities with perfect surface quality.

COREBOARDS

EUROSPAN® E1 P2 (standard coreboard)

Other coreboards available upon request:

- MDF Board
- EUROLIGHT® Lightweight Board
- EUROSPAN® E1 P5 CE
- EUROSPAN® Flammex E1 P2 B/B1/M1 CE
- OSB Combiline

AVAILABILITY

Standard size: 2,800 × 1,310 mm

Laminate thickness: 0.8 mm

Other sheet sizes and laminate thicknesses available upon request

EDGING

Only perfectly matched edge finishes results in the premium impression of the end product. With the EGGER edging programme, ZOOM® offers a complete decorative solution.

EGGER ABS EDGING consists of thermoplastic ABS edging for the decorative finishing of edges on all wood-based materials. It is perfectly coordinated with ZOOM® in terms of colour, grain, surface texture and gloss level, and is available in a large selection of thicknesses and widths.

With a multilayered structure, **EGGER MELAMINE EDGING** is the edge finishing standard for all wood-based materials. EGGER melamine edging is available from stock, with or without hot-melt adhesive coating.

PROPERTIES:

- In decor and texture combinations with ZOOM®
- Additional protective coating on uni decors for error-free processing
- Low roll lengths available from quantity of one roll
- Original EGGER edging is recognisable by the printed reverse side

Edging available in decor and texture match. Details please find in the availability guide.	Melamine Edging, with and without hot melt adhesive			ABS Edging

EUROSPAN® WORKTOPS AND ACCESSORIES

EGGER worktops are ideal solutions for the kitchen and many areas of modern interior design. They are used wherever aesthetics, even under extreme stress, must not be allowed to suffer from a loss of surface quality or longevity.

Models	Formats	Thickness
300/3 one-sided profile 	Length upon request × 600 and 1,200 mm	32 and 38 mm
300/3 two-sided profile 	Length upon request × 900 mm	

Packaging: Individually in shrink foil with melamine edging in matching texture and decor, uncoated.

Matching laminate splashback panels and worktop-wall profiles with a large selection of accessories are also available.

PROPERTIES:

- EUROSPAN® raw chipboard E1 seamlessly laminated with EGGER laminate on flat surfaces and profiles
- Highly resistant against abrasion, impacts and scratching
- PUR hot melt adhesive seal on the rear long edge
- Integrated thin chipboard edging in post-forming applications to optimise surface neutrality and shock resistance

FOR WORKTOP DECORS, see the decor section in this brochure or the ZOOM® availability guide. Additional decors, sheet sizes, thicknesses and coreboards, e.g. EUROLIGHT®, available on request.

ACCESSORIES

- 1 Worktop connectors: Length: 150 mm
- 2 Worktop-wall profiles: 4,100 × 25 × 25 mm in decor and texture combinations or the colours stainless steel and aluminium with matching inside/outside corners and cover caps
- 3 Laminate splashback panels: Length upon request × 640 × 15 mm; laminate applied to both sides
- 4 Splashback system: 4,100 × 25 × 25 mm; in the colours stainless steel and aluminium
- 5 Worktop connection profile: 600 × 38 × 15 mm; in the colours white, bronze and silver
- 6 Transition profile: 670 × 38 × 10 mm; in the colours white, bronze and silver
- 7 Laminate FLEX: (on a roll) from 2,000 mm length × 1,310 × 0.6 mm

FRONT ELEMENTS

AVAILABLE IMMEDIATELY FROM 1 UNIT

Models	Formats	Thickness
200/3 two-sided profile 	2,800 × 160, 271, 296, 396, 446, 496, 546, 596 mm	19 mm
300/4 two-sided profile 	2,800 × 680 mm	

Packaging: individually in shrink foil.

Our front elements feature a seamless transition from the surface to the edge. High quality and functionality guarantee universal application in creative furniture construction and interior design. The ZOOM® collection includes front elements with EURODEKOR®, laminates or EGGER edging in perfect decor and texture combinations.

FOR FRONT ELEMENT DECORS, see the decor section in this brochure or the ZOOM® availability guide. Additional decors, models and sizes available on request.

WINDOW SILLS

NOW AVAILABLE

Models	Formats	Thicknesses
800/6 	4,100 × 160, 200, 250, 300, 400 mm	22 mm
	4,100 × 500 mm also in W980 ST2	
801/6 	4,100 × 160, 200, 250, 300, 400 mm	19 mm doubled to 38 mm
	4,100 and 5,200 × 160, 200, 250, 300, 400, 500 mm also in W980 ST2	

Additional decors from the laminates collection available upon request.

Packaging: 2 units per width and decor in shrink foil. All window sills include uncoated melamine edging in the matching texture and decor.

EGGER window sills span even large windows without joints and represent the ideal solution for new construction projects and modernisation. They are practical, durable and available in an attractive selection of decors with two models.

FOR WINDOW SILL DECORS, see the decor section in this brochure or the ZOOM® availability guide. Additional decors available upon request.

ACCESSORIES FOR BOTH MODELS:

Cover caps are available in the colours white, grey and brown.

PROACOUSTIC ACOUSTIC BOARDS

EGGER acoustics solutions not only offer functional materials for perfect room acoustics but also unique design flexibility thanks to decor and material combinations in the ZOOM® collection.

In order to consistently offer optimised solutions for a wide variety of different applications, we have developed numerous different perforations and slotting patterns. This allows you to combine customised absorption properties with individual aesthetic requirements.

APPLICATIONS:

- Wall cladding and partition walls, as fixed wall structures or acoustically effective partition walls.
- Fixed, acoustically effective ceilings and ceiling systems

ProAcoustic Finest 1,8/1,8/0,5 and ProAcoustic Classic 3/3/1,0

- 1 Diagonally perforated laminate 1.8/1.8/0.5 or linear 3/3/1.0
- 2 Black acoustic membrane
- 3 EUROSPAN® raw chipboard in 18 mm
- 4 Black acoustic membrane
- 5 Laminate balancer paper, linear microperforation

AVAILABILITY:

Format: 2,800 × 1,310 × 20 mm – perforated usable length, Finest 2,770 mm

LOW-FLAMMABILITY, FIRE-RESISTANT ACOUSTIC BOARDS

ProAcoustic Classic and Finest can also be produced as Euroclass B joining elements or with Euroclass A2 coreboards.

ProAcoustic EURODEKOR®

- 1 EURODEKOR® perforated
- 2 Black acoustic membrane

AVAILABILITY:

Format: 2,800 × 2,070 × 19 mm – maximum 3,500 × 2,070 mm
Also available with EGGER MDF coreboard

EUROCLASS B – JOINING ELEMENT TEST

Format: 2,800 × 2,070 × 19 mm – maximum 3,500 × 2,070 mm

More information in the "Acoustic Solutions with ZOOM®" brochure and the "Acoustics ABC", simply order or download as PDF at www.egger.com/downloads

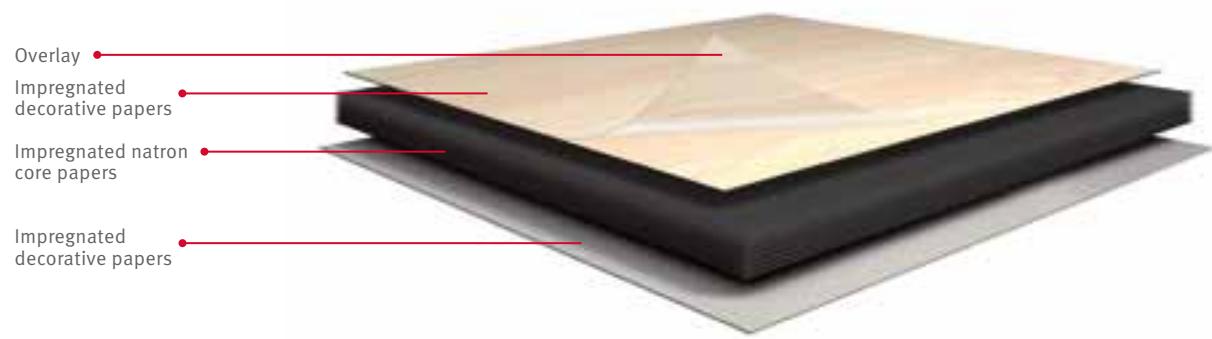

For PROACOUSTIC DECORS, see the decor section in this brochure or the ZOOM® availability guide.

COMPACT LAMINATE BOARDS

EGGER compact laminate boards are constructed of multiple layers of melamine resin impregnated decor papers and several phenolic resin impregnated core layers.

PROPERTIES:

- Numerous areas and fields of application
- Design versatility thanks to decor matched system solutions
- High product quality in accordance with EN 438-4:2005
- Also available as flame-retardant compact laminate Flammex Euroclass B

Board Type	Area of application	Advantages	Certification	Thicknesses
Compact Laminate	Used for interior applications such as tables, work surfaces and wall cladding	<ul style="list-style-type: none"> • Durable, low maintenance surface • High resistance • Decor match with all ZOOM® EURODEKOR® decors 	according to DIN EN 438-4:2005, classified as type CGS (compact general-purpose standard). Normal flammability, not suitable for postforming applications.	5, 6, 8, 10, 12 and 13 mm
Compact Laminate Flammex Euroclass B	Used for interior applications such as tables, work surfaces and wall cladding which need to have flame retardant characteristics		according to DIN EN 438-4:2005, classified as type CGF (compact general-purpose flame retardant); Reaction to fire according to DIN EN 13501: B-s2, d0	

AVAILABILITY

Standard Sizes: 5,610 × 2,060 and 2,800 × 2,060 mm

Standard textures: ST2, ST9, ST15

Same decors are applied to both sides, standard core colour is black (optional brown).

Minimum quantity: upon request

More information available as download at
www.egger.com/downloads

PRE-FABRICATED FURNITURE COMPONENTS

All EGGER materials are also processed into high-quality furniture components for a variety of applications in the kitchen, bathroom and office as well as interior design and commercial projects. High-volume flow lines and CNC machines ensure precise drilling, milling and dowelling. Processing is possible all the way to furniture components ready for installation.

- 1** Spiral groove
- 2** Freeform element with EGGER ABS edging
- 3** Surface dowelling, edge drilling including dowel
- 4** EUROLIGHT® lightweight board – frameless
- 5** EUROLIGHT® lightweight board – with frame

PROPERTIES:

- Highest precision with customised drilling, grooving, edging, ...
- Wide range of decors
- Colour matched materials
- Variety of coreboards

POSSIBLE MATERIALS

Melamine faced boards, raw chipboard, MDF boards, OSB Combiline composite boards, lightweight boards, acoustic boards, postformed elements, laminate bonded boards.

PROCESSING OPTIONS

- Cut-to-size, raw or to measure
- Milling, grooving and rebating
- Application of original EGGER edging
- Drilling and dowelling
- Framing of lightweight boards
- CNC processing

TAKE ADVANTAGE OF THE FULL SELECTION and design diversity in ZOOM® decor and texture combinations for your project!

ZOOM® IS SO MUCH MORE:

ZOOM® not only means product quality and decor expertise – it means a comprehensive service package: **straightforward every day.**

NEED A SAMPLE?

Please contact directly your sales representative or visit the EGGER sample shop where you can order samples and brochures. Very quickly you'll receive A4 samples and information material that can really convince you and your customers – just try it out.

NEED TO VISUALISE YOUR IDEAS?

Digital technologies allow us to now visualise the world of furniture and interior design in a completely new way. With VDS Profi, you have a powerful room visualisation tool to support you in your everyday business.

Go to www.egger.com/vds and download your full version of VDS Profi 3.0 today and test it for 30 days for free! www.egger.com/vds

All decors shown are reproductions. Due to variables in the printing process, colours may vary from the actual product.

ALL INFO & ADVANTAGES. WWW.EGGER.COM

Comprehensive information about our products, services and company is available to you on our website. Here you will find all decors with various views, information on availability, colour values and suitable combination recommendations – straightforward to sort and select:
